Testing is Available For:

- An individual is symptomatic or has a history of symptoms of COVID-19 (e.g. fever, cough, and/or trouble breathing), particularly if the individual is 70 years of age or older, the individual has a compromised immune system, or the individual has an underlying health condition
- An individual has had close (i.e. within six feet) or proximate contact with a person known to be positive with COVID-19
- An individual is subject to a precautionary or mandatory quarantine
- An individual is employed as a health care worker, first responder, or other essential worker who directly interacts with the public while working

Please continue to seek proper medical care when needed and contact your provider if you have urgent healthcare needs. There are many measures in place for individuals who are not dealing with COVID-19 to safely see their provider. Regular check-ups are important, and you should still attend those appointments.

If you have other questions, please contact
